PEROXIDE WELL
IRON & SULFUR SYSTEM

For the wells a standard system can't handle — heavy iron, a strong rotten-egg smell, or tannins. A small pump meters food-grade hydrogen peroxide in at the point of entry, then the system filters and softens.

> Sized only from a **laboratory water test** and a site visit. We don't make health claims about it — we size it off your result.

PEROXIDE FEED

- Oxidizes **iron and sulfur** before the water reaches either tank.
- Includes the **holding tank and dosing pump**.

CATALYTIC CARBON — TANK TWO

- Captures what comes out of solution, takes down the residual, and **flushes itself on backwash**.

HIGH-CAPACITY RESIN — TANK ONE

- **10% crosslinked CG10 resin** takes hardness to zero grains.

WARRANTY

Tank shell, ceramic disc and dry parts — **lifetime**. Control valve and media — **5 years**. Drinking-water system — **1 year**. Our workmanship — **12 months**, in writing. Our workmanship coverage transfers with the home after a signed handover.
