PRE-SEDIMENT FILTER

A 5-micron cartridge housing installed ahead of the whole-home system. It catches sand, silt, rust flakes and grit before they reach the control valve and the media — the parts that cost money to replace.

> **Included on every well system.** Added to city water where there's old galvanized pipe or visible grit at the aerators.

Housing	**20″ × 4.5″ big-blue**	Cartridge	**5-micron pleated**
Service flow	**15 GPM**	Cartridge life	**~6 months on a well**
Installed on	**Every well system**	Bypass	**Yes**

WHAT IT DOES

- Protects the **valve and media** from sediment that would shorten their life.
- Keeps flow steady — a clogged cartridge is a **two-minute swap**.
- Built-in **bypass**, so changes don't shut the house down.

WARRANTY

Housing — manufacturer warranty, through us. Our workmanship — **12 months**, in writing. Cartridges and lamps are wear items on a schedule.

WHAT EVERY INSTALL INCLUDES

- Housing, bracket and first cartridge.
- Installed inline ahead of the system, same visit.
- Change interval in your welcome packet.

AFTER THE INSTALL

Well Care — well visits, priority calls. *Coming soon.*

ADDED TO ANY SYSTEM
INCLUDED ON EVERY WELL SYSTEM
